MSD Notice of Construction CSO 179 Sewer Separation Project

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin constructing new sanitary sewers in Cincinnati’s Clifton neighborhood. Work is anticipated to start the week of April 3rd with substantial completion in February 2018.

MSD will be installing 1,600 linear feet of sanitary sewers to separate flow and discharge to the Mill Creek interceptor. A portion of the existing combined sewer will be plugged and abandoned to eliminate the combined sewer overflow at the combined sewer overflow (CSO) 179 regulator.

We anticipate construction will occur generally between 7:00 a.m. and 5:30 p.m. Monday through Friday. MSD’s construction contractor is Rack & Ballauer Excavating Company.

Typical construction-related disturbances such as noise, dirt and vibrations should be expected throughout the construction period.

This project is part of Project Groundwork, MSD’s multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will protect public health, improve our local streams and rivers and enhance our communities.

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov.
