

## PROJECT EXPERIENCE

### Northeast Ohio Regional Sewer District (NEORSD):

- Renewable Energy Facility
- Euclid Creek Tunnel
- Program Management Phase II
- Broadway Relief Sewer-BRS Broadway Ave.

### City of Toledo:

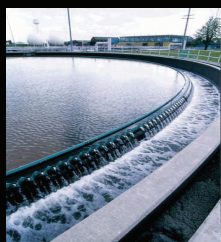

- Permanganate Facility
- Bennett SSES
- Waterways Initiative
- Collins Park Water Treatment Plant Potassium Permanganate Feed Lines

### City of Columbus:

- Comprehensive Water Master Plan
- Chase/ High Street Sanitary Improvements
- Division of Power and Water Parsons Avenue Water Treatment Plant Surface Water Treatment Upgrade
- ODOT Hard Rd. Waterline

DUNs #: 883519217

NAICS Code: 236220, 237110, 237310, 237990

**G. Stephens, Inc. (GSI)** was founded in 1992 and is a full service Construction and Project Management firm that provides services to clients throughout the state of Ohio and western Pennsylvania. Over the past 19 years, the firm has expanded with offices now serving in Cleveland, Columbus, Toledo, Youngstown, and Pittsburgh; with the main headquarters located in Akron, Ohio. GSI is a 100% EDGE certified minority owned, small and disadvantaged (MBE/DBE) construction and project management firm that was developed on a strong foundation of **honesty, integrity, and accountability**.

GSI's project experience includes scheduling and estimating for water supply and water distribution master plans, along with storm water quality through Long Term Control Plans and Storm Water Quality Management Plans. Our team is also experienced in the reduction of combined sewer overflows (CSO's) and sanitary sewer overflows (SSO's). In addition, GSI performs construction management and inspection on water/ wastewater treatment facilities, including distribution and collection lines, pump stations, and process facilities. GSI also has provided expert assistance to various sewer districts in the areas of scheduling, estimating, project controls, and document controls. Instrumental in the accomplishing of these tasks is GSI's use of the best technology available.

Our GSI team is comprised of multiple LEED Accredited Professionals and AWWA Certified Professionals who help bring a wealth of knowledge to help better protect the public health and environmental conditions that plague our water and wastewater overflow systems. Our professional staff implements standard procedures to involve regulatory agencies and companies in the beginning stages of the project. We coordinate with the Environmental Protection Agency (EPA), Public Utilities Commission of Ohio (PUCO), and various public and private utility entities in order to facilitate compliance during the design, engineering, and construction phases.

With municipalities seeking to implement a green infrastructure, our team can provide the added knowledge to the construction process that improves the quality of life to each community .

This confidence in the ability to reach the desired goals and high expectations of each client comes from the overall knowledge and years of experience in the **48 highly qualified and diverse professionals** that are educated and trained in the following areas of: Construction Management, Civil, Mechanical and Structural Engineering, Architecture, Sustainability, Business Management, Marketing and Finance.
